The Brightest Fell is among the best October Daye novels. It centers on the hunt for August, October's lost and possibly dead older sister, daughter of her mother Amandine and her one-time nemesis Simon Torquil. October, who does not take on this quest voluntarily, finds herself allied with Simon, the man who turned her into a fish and left her in a pond for several years prior to Rosemary and Rue. With the reluctant assistance of the Ludaig, the ancient sea witch who October learns on quite heavily for guidance throughout the series, October, Simon, and October's squire Quentin travel to faery and back to find this woman who lost her way home in a quest to find Oberon, the absent all-father of the fae. The books title is, as usual, a portion of a quote from Shakespeare: Angels are bright still, though the brightest fell. Though all things foul would wear the brows of grace, Yet Grace must still look so. In Shakespeare, the brightest is Lucifer; here, the brightest is Simon, who was widely loved and esteemed before his obsession with his daughters disappearance led him into badly-chosen alliances and evil, murderous deeds. The moral core of the book is the question What would you do to save the one you love most? and as October grapples with the question herself, she begins to cautiously feel empathy for Simon, a man who, he says, betrayed everything he stood for in his quest to recover August. As in earlier novels, there is plenty of adventure and violence, plenty of reliance of the kindness of old friends and allies, plenty of development in the back story of October and her family and the fae, and there are plenty of injuries and sacrifices and choices that will be regretted later and perhaps forever. The ending, as is also typical for the series, is both sweet and bitter, with peace, triumph, tragedy, hope, and foreboding all together. McGuire tells stories about the fae, but they are never simply cautionary tales nor are they happily ever after, which is probably a good thing. Important P.S. The novel is secretly packaged with the bonus novella Of Things Unknown, featuring the first-person narration of cyber-dryad April O'Leary. Thematically related to the novel, April and her kin may be able to resurrect the people they lost in A Local Habitation (October Daye Series Book 2) through a combination of technology and magic, but what if only some of them can be saved?
